## ABOUT ME

A diligent and dedicated frontend developer, eager for work, new knowledge, and experiences. At the "CODE" academy by Comtrade, I acquired knowledge of the latest technologies and programming languages, graduating with an average grade of 9. Currently, I have no work experience due to recently finishing high school, but I possess both serious and hobby projects that I developed during my high school education. My current focus is on gaining experience and maximizing my knowledge. I am characterized by diligence, curiosity, readiness to take on responsibility and initiative. Additionally, I possess excellent speaking skills acquired through the legal-business technician course in high school. Furthermore, I have more than a solid knowledge of the English language, which I improve daily.
